| Question 8 Complete Mark 1.00 out of 1.00 What does `FROM scratch` mean in a Dockerfile? a. Use base image from Alpine b. Use an empty base image c. Use the latest Ubuntu version |
|--|
| What does `FROM scratch` mean in a Dockerfile? a. Use base image from Alpine b. Use an empty base image |
| What does `FROM scratch` mean in a Dockerfile? a. Use base image from Alpine b. Use an empty base image |
| a. Use base image from Alpineb. Use an empty base image |
| a. Use base image from Alpineb. Use an empty base image |
| a. Use base image from Alpineb. Use an empty base image |
| b. Use an empty base image |
| b. Use an empty base image |
| |
| C. Use the latest Opuntu version |
| |
| ○ d. Rebuild all dependencies |
| |
| Question 9 |
| Complete |
| Mark 1.00 out of 1.00 |
| |
| |
| What does the `agent any` directive do in a Jenkins Declarative Pipeline? |
| |
| |
| a. Runs on any available executor |
| ○ b. Assigns the pipeline to the master node |
| b. Assigns the pipeline to the master nodec. Runs only in Docker agent |
| b. Assigns the pipeline to the master node |
| b. Assigns the pipeline to the master nodec. Runs only in Docker agent |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark 1.00 out of 1.00 What happens if you run a Docker container with therm flag? |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark 1.00 out of 1.00 What happens if you run a Docker container with therm flag? a. The container is removed after it exits |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark 1.00 out of 1.00 What happens if you run a Docker container with therm flag? a. The container is removed after it exits b. The container image is deleted |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark 1.00 out of 1.00 What happens if you run a Docker container with therm flag? a. The container is removed after it exits |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark 1.00 out of 1.00 What happens if you run a Docker container with therm flag? a. The container is removed after it exits b. The container image is deleted |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark 1.00 out of 1.00 What happens if you run a Docker container with therm flag? a. The container is removed after it exits b. The container image is deleted c. The container is paused after execution |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark 1.00 out of 1.00 What happens if you run a Docker container with therm flag? a. The container is removed after it exits b. The container image is deleted c. The container is paused after execution d. The container restarts automatically on failure |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark 1.00 out of 1.00 What happens if you run a Docker container with therm flag? a. The container is removed after it exits b. The container image is deleted c. The container is paused after execution d. The container restarts automatically on failure Question 11 |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark 1.00 out of 1.00 What happens if you run a Docker container with therm flag? a. The container is removed after it exits b. The container image is deleted c. The container is paused after execution d. The container restarts automatically on failure Question 11 Complete |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark 1.00 out of 1.00 What happens if you run a Docker container with therm flag? a. The container is removed after it exits b. The container image is deleted c. The container is paused after execution d. The container restarts automatically on failure Question 11 |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark 1.00 out of 1.00 What happens if you run a Docker container with therm flag? a. The container is removed after it exits b. The container image is deleted c. The container is paused after execution d. The container restarts automatically on failure Question 11 Complete |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark 1.00 out of 1.00 What happens if you run a Docker container with therm flag? a. The container is removed after it exits b. The container image is deleted c. The container is paused after execution d. The container restarts automatically on failure Question 11 Complete |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark 1.00 out of 1.00 What happens if you run a Docker container with therm flag? a. The container is removed after it exits b. The container image is deleted c. The container is paused after execution d. The container restarts automatically on failure Question 11 Complete Mark 1.00 out of 1.00 |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark 1.00 out of 1.00 What happens if you run a Docker container with therm flag? a. The container is removed after it exits b. The container image is deleted c. The container is paused after execution d. The container restarts automatically on failure Question 11 Complete Mark 1.00 out of 1.00 |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark: 1:00 out of 1:00 What happens if you run a Docker container with therm flag? a. The container is removed after it exits b. The container image is deleted c. The container is paused after execution d. The container restarts automatically on failure Question 11 Complete Mark: 1:00 out of 1:00 What happens when you use the 'docker run -d' command? |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 |
| b. Assigns the pipeline to the master node c. Runs only in Docker agent d. Executes on all nodes simultaneously Question 10 Complete Mark 1.00 out of 1.00 What happens if you run a Docker container with therm flag? a. The container is removed after it exits b. The container image is deleted c. The container is paused after execution d. The container restarts automatically on failure Question 11 Complete Mark 1.00 out of 1.00 What happens when you use the 'docker run -d' command? a. Deletes existing containers before starting new b. Runs container in background and returns container ID |
